# Aerial Rigging Fundamentals

Learn to spot red flags....

---

***"... an outstanding resource for artists or technicians of any level or background ..."***

Weekend 21 + 22 January 2023, price € 285

This two-day training covers not only the basics and not so basics of rigging for aerial performance but also your legal obligations and requirements so you can keep yourself and people in your care safe and alive.

# HOW TO FLY SAFELY?

As a professional circus artist or recreational circus enthusiast, you often come in different spaces to train or perform. The most important question is always, is it safe to fly? And that is not always so easy to assess. Your life is literally on the line. How do you know it is safe?

This two day training will change everything. Under the inspiring guidance of Bryan Donaldson of High Performance Rigging, you will learn to assess if there are any red flags in a rigging situation. The training is given in English.

## ◆ Calculating different Loads

Useful definitions such as MBS, WLL, KN, DF and how to convert

## ◆ Knowing your equipment

Sourcing the best equipment for the job and using it properly.

## ◆ Automation

Can you safely use winches and keychain hoist to hang a flying performer at a venue?

## ◆ Different types of access

Working with rope access, MEWP access, Scaffold towers

## YOUR TRAINER BRYAN DONALDSON

As owner of High Performance rigging, Bryan years of experience, both as performer and as Rigger. He has worked for Cirque du Soleil, BBC, Disney, HBO, Billy Elliot and many others

✓ including complete manual ✓ including digital content

# THEORETICAL AND PRACTICAL

Two half days are reserved for practical application of what you have learned on the studio floor of Circus Studio Rotterdam:

- ◆ **Rescue at Height**  
Assessing, planning and safely executing rescue situations.
- ◆ **Measure your show**  
How to use a load cell to know the exact force you generate?

***Download our training prospectus  
from our website for the full program***

# STANDARDS, LEGAL AND LAW

What is the applicable legislation for rigging, what are good standards and what are the best practices you can use

## Risk assessment

Understanding all the risks and mitigating them.

## Inspecting, testing

Making sure everything is well documented.

## Planning

Rigging plans, Technical Riders and rescue plans

**No more guessing.....**

*Perform with the confidence that you  
know the exact force of your show.*
